

TAHMID MUNTASER

SOFTWARE ENGINEER

Phone: 01643372506

Email: tahmid25muntaser@gmail.com

Address: Mirpur, Dhaka

GitHub: [TahmidMuntaser](#)

Portfolio: <https://tahmidmuntaser.vercel.app>

LinkedIn: [Tahmid Muntaser](#)

Education

B.Sc.(Eng.) in Computer Science and Engineering

2022 – 2025

Jashore University of Science and Technology

CGPA: 3.49 / 4.0

Skills

Languages: JavaScript, C, C++, Python, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Django, Django REST Framework

Databases & Tools: PostgreSQL, SQLite, Git, GitHub, Docker

Competitive Programming

Codeforces: [TAHMIDMUNTASER](#) | Max Rating: 1230 | 800+ problems solved, Pupil

CodeChef: [tahmidmuntaser](#) | Max Rating: 1610 | 250+ problems solved, 3-star

LeetCode: [tahmid25muntaser](#) | Max Rating: 1534 | 250+ problems solved

Projects

BDPriceGear – A Price Comparison Platform | [Live Link](#) | [GitHub](#)

- Built a price comparison platform for 12+ categories, 22K+ PC products from 10+ Bangladeshi e-commerce sites.
- Developed real-time and scheduled web scrapers with anti-bot bypass, caching, and automated data pipelines.
- Built REST APIs, product filtering, and side-by-side comparison features.
- Developed a chatbot using the platform database for product Q&A, PC part and build suggestions.
- Added wishlist, stock alerts, and product recommendations based on price, category, and availability.
- Technologies: Next.js, Tailwind CSS, Django, Django REST Framework, PostgreSQL, SQLite, GitHub Action.

AutoCP – Automated Problem Generation Platform | [Live Link](#) | [GitHub](#)

- Built an AI-based platform to generate competitive programming problem sets by topic and difficulty.
- Implemented AI-powered test case generation and automatic input/output validation.
- Built interactive interfaces for user input, problem generation, and test case visualization.
- Technologies: React.js, JavaScript, Tailwind CSS, Node.js, MongoDB, Express.js

ReliefLink - Relief distribution management system | [GitHub](#)

- Developed a web-based disaster relief system with role-based dashboards.
- Implemented real-time tracking of family needs and resources to avoid duplication.
- Built a responsive UI for volunteers with visual status reports to monitor affected areas efficiently.
- Improved communication between local authorities and volunteers for faster relief operations.
- Technologies: HTML, CSS, Django, SQLite3, PostgreSQL

AutoDocs – Certificate Generation System | [Live Link](#) | [GitHub](#)

- Built frontend and admin dashboard using React and Tailwind CSS.
- Implemented profile updates and integrated Django REST APIs for secure, real-time data access.
- Built a secure system to automate academic documents and certificate generation, reducing manual work by 90%.
- Contributed to a platform with verified delivery and payment options, improving user trust and efficiency.
- Technologies: React.js, Tailwind CSS, Django REST Framework.

Achievements

SOLVIO AI Hackathon 2025 - Team JUST_DOMinators: Top 10/538, reached final round

HackTheAI - Green University of Bangladesh - Team JUST_DOMinators: 41st/242, final round

BUP CSE TECH CARNIVAL 2025 - Team JUST_DOMinators: Top 20/80, reached final round
